

ERRATA CORIGE

In the paper »Krapina and Other Neanderthal Clavicles: a Peculiar Morphology?«, published in *Periodicum biologorum*, vol. 108, no 3, p.331-339 by Jean-Luc Voisin, all Taforalt (Taf) values were reversed in Table 2. Below is the corrected table.

TABLE II.

Values of the inferior and superior curvatures in Upper Palaeolithic remains, Neanderthal, *Homo antecessor*, *Homo ergaster* and *Homo habilis*. /: presence of a curvature impossible to assess because of the incompleteness of the fossil.
